|-----------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 5/20/2026       | Spoke with reporting party via phone. This spill involved boring fluids which contained Trubore, a crystalline silica additive, which according to the SDS, "If product becomes a waste, it does NOT meet the criteria of a hazardous waste as defined by the US EPA." SDS was uploaded to report. RP has uploaded incident photos and cleanup photos. RP also called in the incident since it did affect water in a drainage and wetland, however it was isolated and did not travel into the culvert. Follow-up needed. |
